TWIN CITY ANCIENT COIN CLUB MEETING NOTICE....
FOR February, 23rd, 2012. Vol. 52, Number 2

PRESENTATION: Greek Small Change

As soon as coins were conceived, denominations spanned from the very large to the very small. The largest coins represented one-hundred times the value of the smallest. History often focuses on the large, the political history: Rulers, their wars, and their economy. These top denominations would have paid salaries, bought land and wholesale supplies as well as slaves. The smallest denominations would have been used in the markets to make daily purchases of rations, clothes, and entertainment. Today we'll examine the smallest precious metal coinage in the ancient Greek world as well as the first bronze coinages. Rather than presenting early small change as a narrative we're going to try a more interactive exercise. The presentation will focus on the facts and will ask the group to draw their own conclusions. Bring your early small change if you have any and be prepared to listen and discuss their use.

AGENDA

1. Social Hour 7:30PM-8PM
2. Treasurer's Report
3. Open Business
4. Presentation
